Momentum to Expand Internet Data Centre

Toronto, Ontario December 21, 2006 – **Momentum Advanced Solutions Inc. (TSX:WWW)**, “**Momentum**”, a leader in the emerging world of Internet outsourcing, announced today that it will increase capacity at its Internet Data Centre and expand its network operations centre in Markham, Ontario.

In order to meet increasing market demand for its Managed Services, Momentum has begun construction on building-out an additional 2,500 sq. ft. of raised floor while also adding two additional GigE Internet circuits. The additional high capacity GigE Internet circuits have been provisioned to ensure maximum network performance for both current and future customers.

Momentum has been able to take full advantage of the current build by designing the new environment to accommodate the ever increasing power and cooling requirements associated with the latest, high density blade based technology.

Momentum’s unique Internet outsourcing model provides organizations with a single point of accountability in the design, delivery and operation of their mission critical web-based applications and infrastructure. The model encourages customers to focus on their core business processes while allowing the Momentum team of Internet experts to fully manage their web properties from innovation through to operations. As a result of this model, Momentum has been able to demonstrate 35% year-over-year revenue growth in its Managed Service line of business and is currently serving nearly 100 unique customers.

“Momentum has a clear vision; to be a leader in the emerging world of Internet outsourcing”, stated Sheldon Pollack, CEO of Momentum. “We firmly believe that customers are looking for an expert organization that will manage their entire Internet value chain from innovation and thought leadership, right through to secure data centre operations”.
