Momentum Inks Strategic Partnership Agreement with Leading Technology Provider

Momentum Extends its Reach for Hosting and Managed Services

TORONTO, ONTARIO, March 27th, 2008—Momentum Advanced Solutions Inc. (TSX: WWW), a leader in IT hosting and interactive services, has signed a partnership agreement with the Canadian arm of one of the world's top five technology resellers that enables Momentum to offer a suite of hosting and managed services to the partner's extensive, predominantly mid-market, customer base.

This agreement which is the first of its kind for Momentum, calls for the company to offer its complete line of data centre services directly through the partner's national, 150 person sales organization. These services include co-location, dedicated servers, fully managed IT services, remote monitoring and automated data back-up.

"We are confident that this agreement will allow Momentum to reach significantly more of those mid-sized organizations who can benefit most from our data centre service offerings", stated Phil DeLeon, president of Momentum. "In addition, we believe a partnership with the Canadian arm of one of the world's largest technology resellers validates our overall strategy to market out data centre services through a channel centric, go-to-market model."

Momentum has recently added its newly acquired 20,000 square foot data centre facility with over 8,000 square feet of highly secure and reliable raised floor in Toronto to its data centre inventory.

Momentum customers and partners benefit from the Obsessive Support commitment which has become part of the DNA to one of the largest technical teams found at any hosting company in Canada. Momentum boasts over 200 industry certifications from leading organizations such as; Microsoft, IBM, HP, Sun, Citrix, VMware, Redhat, Symantec and Cisco.
